

Since September 2001, Camco SA has provided a wide range of services in the Civil and Building Industries.

Our experience includes:

Civil Infrastructure Construction

Land divisions
Pipelining
Stormwater quality
Pumpstations
Concrete structures
Bulk earthworks
Urban Renewal
Road construction
National parks
Tactile installation

Property Maintenance Services

Glazing
Aluminium fabrication
Roof plumbing
Carpentry
Paving
Steel fabrication
Bitumen repairs
Fencing
All general internal & external repairs

Commercial Building Works

Internal fitouts
Building extensions
Large commercial buildings
DDA compliance upgrades

We would welcome the opportunity to further expand and discuss our experience, capability and capacity.

What's coming up?...

A well deserved break... (for most of us)

But we do look forward to the exciting new projects and challenges that 2016 has in store for us.

Woodvale Stage 2E Land Division, Greenhill Engineers

Construction of a 30 allotment land division a Gawler South. Suffolk Road, Hawthorndene Drainage, City of Mitcham

Construction of new stormwater drainage along Suffolk Road, Hawthorndene.

Tiller Drive Stormwater Upgrade, City of Onkaparinga

Relining of an existing steel stormwater outlet pipe on the Aldinga foreshore.

Little Rundle Street Lighting, Kent Town City of Norwood

Payneham & St Peters Installation of new public lighting.

Walleroo Primary School Hardplay Upgrade, DPTI

Hardplay upgrade at Wallaroo Primary School.

Endeavour College Carpark, Endeavour College

Construction of a new carpark and "kiss and go" driveway at Endeavour College Mawson Lakes.

Metro Valve Replacements, Allwater

Replacement/removal of valves at various locations.

Aldinga On The Run Slip-lane, Peregrine Corporation

Construction of a new slip lane off Main South Road to enable access to the new OTR.

Duncan Lane Reconstruction, City of West Torrens

Reconstruction of Duncan Laneway at Lockleys.

Drainage Rectification Works, Scotch College

Construction of an on-site stormwater detention system to manage high flow levels from Scotch College.

Ashley Street, Torrensville Drainage, City of West Torrens

Construction of approximately 500m of new stormwater drainage.

The Inner Sanctum...

Marco Puz, System Manager

Successful achievement... This is the longest time I've stayed at the same company in 15 years (3½ years and counting).

Loves... My children, my wife, my saxophone, reading a good book with jazz playing in the background (not necessarily in that order).

Looking forward to... Growing up with my children (it's probably about time I act older than them) and playing my sax on a street corner when I retire.

Best thing about working for Camco... The people. We might not agree on everything, and they may be tired of my relentless push for safety, quality and compliance but at least we can have a drink and a friendly chat when work is done.

What's new at Camco?...

December 2015

Ho, Ho, Ho, Merry Christmas! Well almost anyway. Its hard to believe we are sending out our final "What's new at Camco" newsletter for 2015. Preparations are all but completed for the annual closure, although this year we have a few more "lucky" team members working through the break than usual.

2015 has not been a year without challenge for the construction industry as the SA economy generally and the construction sector in particular continue to "bumble" along the gravelly bottom. As they say, its times like these that present opportunities for those that are prepared to seek them. Despite the general gloom, our willingness to adapt and preparedness to make change whilst adhering to our core values has delivered surprisingly pleasant results for 2015. A real reward for hard work and team spirit.

In April, we made a decision to focus on quality outcomes at the expense of growth, "getting back to the basics" of what has seen Camco gain industry recognition for almost 15 years. Of course, none of this would be possible without the support of great people – in house team members (some of which you will have seen in our "inner sanctum"), external contractors and a loyal client base. On behalf of the management team, I would like to say thank you for your continued support throughout 2015, have a Merry Christmas and I look forward to continuing the journey into 2016...**Chris Goold, Director**

In-house news...

Christmas is just a few weeks away and we will be closing down over the holiday period. Camco's last working day is **Tuesday 22nd December 2015** and we will be reopening on **Monday 11th of January 2016**. During this period we will have staff on-call and their details can be retrieved by contacting the office on 8332 1199.

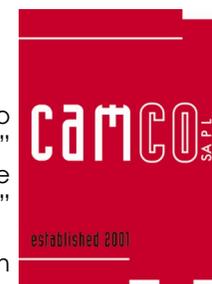

To all our clients, we would like to take this opportunity to wish you and your families a very merry Christmas and a happy and safe new year! We look forward to working with you again in 2016!

Camco Management System/System Manager

As identified in the last newsletter, the safety focus during this last quarter was on the forthcoming hot weather. During Safe Work Week in October, all site personnel attended a Cancer Council "SunSmart" presentation hosted at the Camco office. The message on sun safety was well received as well as being an enlightening information session. Our thanks go to Cancer Council SA.

In keeping with the theme, Camco also introduced a new "inclement weather" policy which, for the first time, takes into account hot as well as wet weather. To complement this policy, mandatory long trousers and long sleeve shirts on all worksites were also introduced. Sure enough, the hot weather hit sooner than expected in early November. We will review the policy and procedure in Autumn 2016 to ensure it is effective.

Also, it appears we will end the calendar year with no lost time injuries. Congratulations to all Camco staff for your commitment and remember to maintain your safety focus throughout the festive season.... **Marco Puz, System Manager**

Innovation

What's news?...

Linden Park Primary School Replacement Transportables, Spotless

Camco was engaged to install two new portable classrooms at the Linden Park Primary School. The project scope included demolition of the existing portable classroom, tree removal, site clearing, isolation of existing services, bulk earthworks to new bench levels, concrete footing construction, 1st and 2nd fix services – electrical, hydraulic, mechanical and communications – concrete retaining walls, access ramps and stairs, covered deck construction and perimeter landscapes – paving and garden, the demolition and preparation works were carried out during the school term allowing the transportable buildings to be delivered during the school holiday break. The careful management of pedestrian traffic was crucial for the safety of the 2000 students that attend the school. The access to the site was particularly difficult due to the need to travel across the school's oval during winter, so a rubble road was constructed to allow the delivery trucks access. This rubble road was removed on completion and the oval reinstated with new roll out turf.

Bolivar Midge Fly Vegetation Screen Stage 3, SA Water

Camco has been engaged to design and construct an irrigation network at the Bolivar Waste Water Treatment Plant. The treatment lagoons are a breeding ground for midge flies during the hot summer months. The project is a pilot trial beginning with 25Ha of crops, with an aim to have the midge flies settle onto the fields where they can be treated with conventional spraying techniques. Included in the project scope is a new grey water pump station, various pipeline installations totalling approx. 1.5km of new pressure mains, supply and installation of a travel irrigator sprinkler system, plus design and commissioning of new electrical and telemetry for remote controlling of the system. Design has commenced and construction is due to start in Feb 2016.

Port Wakefield Road Slip Lane, Peregrine Corporation

One of Adelaide's largest petrol stations is being built at the corner of Port Wakefield Road and Hodgson Road with Camco being contracted to construct a slip lane into the new On The Run. The project scope includes demolition of the existing kerbs and pavements, excavation to subgrade level, culvert, headwall, swale construction, new deepflift bitumen pavement and new lighting.

Facilities, Building & Maintenance Services (FBMS)

Norwood Swimming Pool Remedial Works, City of Norwood Payneham & St Peters

Camco was engaged by the City of Norwood, Payneham and St Peters to complete some urgent concrete repair works on the Norwood swimming pool at Phillips Street, Kensington. The pool had been increasingly leaking water over the weeks leading up to the season opening, the cause of which had not entirely been identified. Camco, worked closely with the lead consultant and the council project manager, investigated the source of the leak and carried out concrete repairs using specialised water proofing products. The end product exceeded expectations and the pool was returned to operational status in time for the new season.

Prequalification, Panels & Accreditation

Camco's current prequalification and accreditation status is as follows:-

| Organisation | Prequalification Type | Categories |
|---|---|--|
| Department of Planning, Transport & Infrastructure AGFMA/Facilities Services | General Building Contractor Trade Contractor – Civil Work Roads & Bridges Preferred Contractor | 3, 4, 4M 1, 2, 3, 4, 4M R2, B1, F15 Breakdown & Preventative Services |
| City of Burnside | Minor civil works & building maintenance | Earthworks/flood mitigation, pipes, pumps & concrete products, stormwater |
| City of Mitcham | Major civil works | All |
| City of Onkaparinga | General civil works | All |
| District Council of Mount Barker | Minor civil works | Level 2 |
| City of Salisbury | Minor civil works & building maintenance | Carpentry, earthworks/flood mitigation, minor building & civil works, pipes, pumps & concrete products |
| SA Water | Construction services | Tiers 2 and 3 |
| APP Corporation | Transfield Services CMS-SA Multi Use List | Excavation, civil works and erosion control |
| Spotless | Preferred subcontractor | Carpentry and Multi-trade |
| UniSA | Prequalified contractor | Category 2 |
| JLL | Preferred subcontractor | Maintenance & Repairs for the Golden Grove Village |
