

Since September 2001, Camco SA has provided a wide range of services in the Civil and Building industries.

Our expertise includes:

#### Civil Infrastructure Construction

- Land divisions
- Pipelining
- Stormwater quality
- Pumpstations
- Concrete structures
- Bulk earthworks
- Urban renewal
- Road construction
- National parks
- Tactile installation

#### Property Maintenance Services

- Glazing
- Aluminium fabrication
- Roof plumbing
- Carpentry
- Paving
- Steel fabrication
- Bitumen repairs
- Fencing
- All general internal & external Repairs

#### Commercial Building Works

- Internal fit outs
- Building extensions
- Large commercial buildings
- DDA compliance upgrades

We would welcome the opportunity to further expand and discuss our experience, capability and capacity.

## What's news?.....

### Druids Avenue, Mount Barker – Pavement, Pipeline & Civil Ancillary Works

Druids Avenue is a collector Road defining the Northern edge of the CBD of the Mount Barker township. Being adjacent the CBD, consideration was given to access for PTB buses, shop delivery vehicles including semi-trailers, school traffic and pedestrian movements in direct proximity of the worksite. The project comprised 5 major components spread along the length of Druids Ave, between Adelaide Road and Cameron Road. These components were:

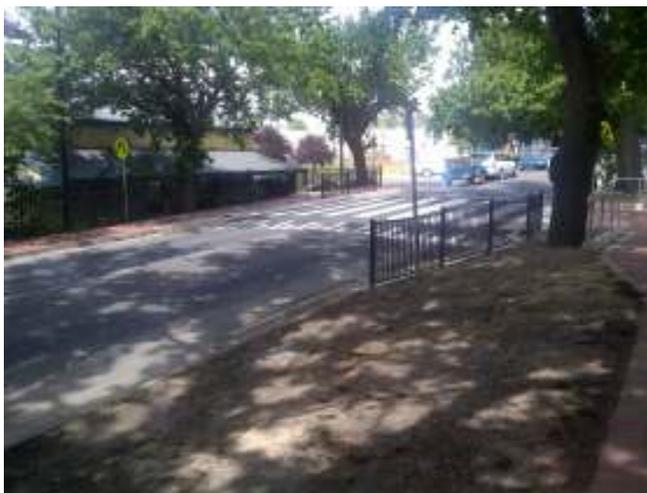

- 1) Road widening and construction of a Pedestrian Refuge Island at the intersection of Walker St.
- 2) Diverting an existing 100mm CWMS pipeline along Druids Ave and Stephens Street, removing it from under adjacent buildings.
- 3) Providing a new bitumen wearing course to the roadway between Adelaide Road and Hutchinson Street, including profiling and replacing sections of failed pavement.
- 4) Construction of a new Wombat Crossing just East of the Hutchinson Street intersection.
- 5) Providing a temporary roundabout at the Cameron Road intersection.

These construction works were staged & night works were undertaken where required to allow minimum disruption to normal traffic conditions.

**Principal:** District Council of Mount Barker

**Value:** \$750,000

**Construction Period:** 10 weeks

## What's new at Camco?....

December 2013

Amazingly 2013 is drawing to an end. As the Christmas "rush" begins and our focus turns to completing projects in preparation for holidays I think it is important to take the time to reflect on the year that has been.

At Camco, it has been another challenging year as the construction industry continues to perform well below long term averages.

This is not all negative.

We have managed to strengthen and grow despite these external conditions where many companies in the construction space have fallen over. Our commitment to our core values and desire to be the "best in our field" stands us in good stead regardless of the external world.

The achievements of the past year can be clearly seen through our return to the SA Water Panel of Contractors as a tier 2 contractor; our expansion into various design and construct projects such as the City of Unley MAR schemes; our appointment to several local government minor works panels such as the City of Burnside, City of Salisbury, City of Onkaparinga and the District Council of Mount Barker and the successful renewal of our prequalification status in ISO9001, ISO14001 and AS4801.

These achievements have seen us develop our existing skills further and have seen us add some fantastic new talent to the team.

As we put a close on 2013 and our focus looks toward the exciting promise of the new year, I would like to take this opportunity to thank all of you for your continued support throughout the year and on behalf of all of the Camco Team wish you and your families a Merry Christmas and a safe and prosperous New Year.

I look forward to seeing you all again in 2014!

**Chris Gould, Director**

### Latest in-house news

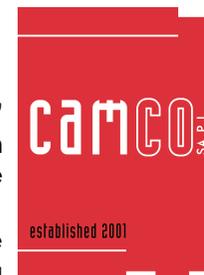

We would like to welcome two of our newest members to the Camco team – **Lori Kitson-Currie** as Office Coordinator and **Laurence Watson** as Finance Manager.

Lori brings almost 20 years of administrative experience and brings a high level of organisational, time management and analytical skills.

Laurence brings many years of business and financial management experience and has extensive forecasting and budgeting experience.

We congratulate **Sam Piotrowski** on this completion of his Bachelor of Engineering (Civil & Structural) combined with a Bachelor of Finance. Sam joins the team on a fulltime basis from December 2013 as a Project Engineer.

It isn't very long to Christmas and as always we close down for a couple of weeks. Please note our last working day for 2013 will be Friday 20<sup>th</sup> December from 1pm, reopening Monday January 13<sup>th</sup> 2014. We will have skeleton staff available & details can be obtained by contacting our office line during our break.

# What's news?.....

## Dry Creek Rail Simulator Room Construction

As part of the South Australian Government's rail revitalisation program Camco was engaged to build a new simulator room/facility at the DPTI Dry Creek Depot. The area is designed to house a state of the art full cab simulator equipping rail staff with the knowledge to understand the unique training needs that PTS staff require when operating the new electrified A-City Class 4000 passenger trains that will run between Adelaide and Seaford early next year.

The facility was constructed within an existing shed at the Dry Creek Depot, the build included architectural components, structural modifications, civil components and an extensive mechanical, electrical and communication fit out.

**Principal:** Department of Planning, Transport & Infrastructure  
**Estimated Value:** \$300,000  
**Construction Period:** 6 weeks

## Kings Road Roundabout Construction, Paralowie

Kings Rd & Whites Rd are both main collector roads within the City of Salisbury and are highly trafficked, catering for over 2,000 vehicles per day.

Whilst Whites Rd is a Council owned road, Kings Rd comes under the control of the Department for Planning, Transport & Infrastructure (DPTI).

Due to the new construction of nearby Green Tree Walk Estate Land Division (another Camco project)

it was decided that an upgrade to the existing intersection was required to facilitate the new road into the estate by introducing a roundabout to help with the many movements of traffic through the intersection.

Camco's recent upgrade in pre-qualification with DPTI from R1 to R2 meant that we were able to tender and subsequently were awarded the construction of a new roundabout at the intersection. The construction involves drainage, service relocations, excavation, pavements, kerbing, asphalt laid up to 300mm thick and public lighting installation.

The Camco team has been faced with the difficult challenge of continuous flow of traffic past the site during construction as well as public transport bus movements within the staged work area. The traffic management required close liaison with DPTI, Passenger Transport Services including bus detours and management, The City of Salisbury and nearby Residents and shops. Camco has demonstrated a high level of technical and practical ability on the project and places us in good stead for future work with both DPTI and The City of Salisbury. The project is due for completion end November.

**Principal:** City of Salisbury **Estimated Value:** \$750,000 **Construction Period:** 10 weeks
